

REMARKS

The Office Action of March 20, 2008, and the cited art have been carefully considered. The recognition of allowable subject matter in claims 1-17 is gratefully acknowledged. The application has been amended to eliminate unnecessary limitations and to correct grammatical and similar errors. Reconsideration of the rejection of the application is respectfully requested based on the amendments and following discussion.

Claim 1 was rejected under 35 USC 112 for a typographical error, and for indefinite language.

Claim 1 has been amended as to form and not as to scope, correcting a typographical error, and deleting the indefinite language.

Claim 15 was rejected under 35 USC 112 for lack of an antecedent.

Claim 15 has been amended indicating it has portion configured to mate in a lamp socket for electrical and mechanical connection, and the antecedent reference has been corrected.

It is believed that a full and complete response to the Office Action has been made, that the Application as amended is patentably distinct over the cited art, and that the case is now in condition to be passed to issue. Reconsideration of the amended application is therefore requested, and an early favorable notice of allowance is courteously solicited.

Respectfully submitted,

By 

William E. Meyer
